

Day 0

- Group split into roles
 - Jantony: Recorder
 - Coral: Spokesperson
 - Yao: Manager
 - Jasiel: Process Analyst
- Each one of the members finished the first project "Introduction to DataCamp Projects" individually to familiarize themselves with DataCamp.
- Coral screenshared to improve group coordination
- We split the work of the second project in 4, each student taking a different prerequisite course
 - Jantony: Introduction to Tidyverse
 - Jasiel: Introduction to Importing Data in R
 - Coral: Introduction to Cleaning
 - Yao: Would read and analyze the second project to coordinate what sort of information we would need

Summary

The Group started working on both assigned projects and was able to finish the first project "Introduction to DataCamp Projects" as well as finish 3 steps of the 10 steps required for the second project "Importing and Cleaning Data". This part did not require much interaction between group members as it was for each member to get used to data camp.

Day 1

- Group immediately started working where they left off with the same work division as before
- Jantony screenshared to improve group coordination
- Working together with the help of Yao managing the group and advice from Jasiel was able to finish steps 3 - 10

Summary

The group started from where they left off and finished the last 6 steps of the project without much difficulty.
